Claim Status

Claims 32-40 are pending. Claims 1-31 have been cancelled. Claims 32-40 are rejected as detailed below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 32 and 34-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Applicant's admitted prior art.

Claims 32 and 35-39:

Applicant discloses as admitted prior art:

a data recording area in which a lead-in area and a volume space are allocated in advance [Fig 13, 108] ,

wherein an advanced VAT structure area is allocated in the volume space [Fig 13, 122],
advanced VAT information for managing a relationship between virtual addresses each indicating an address in a virtual address space and logical addresses each indicating an address in a logical address space is recorded in the advanced VAT structure area [paragraph 20]

Art Unit: 2161

in the advanced VAT information basic structure information indicating a file structure which is indispensable for searching all files recorded in the information recording medium is assigned to at least one of the virtual addresses [paragraph 8].

Claim 34:

Applicant discloses as admitted prior art wherein the advanced VAT structure area is allocated at an end of an accessible area [Fig 13, 130].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art and further in view of US Pat No 4,922,415 issued to Hemdal (hereafter Hemdal).

Claim 33:

Applicant discloses as admitted prior art the elements of claim 32 as noted above but does not disclose wherein the basic structure information includes a file set descriptor and a file entry of a root directory; and the advanced VAT information includes a first VAT entry for assigning a logical address of the file set descriptor to a virtual address 0, and a second VAT entry for assigning a logical address of the file entry of the root directory to a virtual address 1.

Art Unit: 2161

Hemdal discloses a virtual address of 0 and a virtual address of 1 [Fig 20, col 24, line 7 and col 24, line 30]. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Applicant's admitted prior art to include wherein the basic structure information includes a file set descriptor and a file entry of a root directory; and the advanced VAT information includes a first VAT entry for assigning a logical address of the file set descriptor to a virtual address 0, and a second VAT entry for assigning a logical address of the file entry of the root directory to a virtual address 1 based on the teaching of Hemdal for the purpose of commencing entries in a table at a logical starting point.

Claim 40:

Applicant discloses as admitted prior art the elements of claim 39 as noted above but does not disclose wherein the basic structure information includes a file set descriptor and a file entry of a root directory; and the advanced VAT information includes a first VAT entry for assigning a logical address of the file set descriptor to a virtual address 0, and a second VAT entry for assigning a logical address of the file entry of the root directory to a virtual address 1. Hemdal discloses a virtual address of 0 and a virtual address of 1 [Fig 20, col 24, line 7 and col 24, line 30]. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Applicant's admitted prior art to include wherein the basic structure information includes a file set descriptor and a file entry of a root directory; and the advanced VAT information includes a first VAT entry for assigning a logical address of the file set descriptor to a virtual address 0, and a second VAT entry for assigning a logical address of the file entry of the root directory to a virtual address 1 based on the teaching of Hemdal for the purpose of commencing entries in a table at a logical starting point.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat No 6,681,239 issued to Munroe et al discloses shared address space among multiple virtual address spaces.
